

# TITAN

# Muvi HD Pro3

## Firmware Update Instructions

### Firmware Installation

1. Run the Muvi HD Pro 3 software and then connect the camera to your PC (ensure the camera is switched off)
2. Enter your six-digit password, select the 'Removable Disk' option, and click 'Apply'
3. Drag and drop the 'SD\_CarDV.bin' file into the opened USB Drive folder
4. Disconnect the HD Pro 3 from your PC, allowing the camera to shut down. Plug the camera back into your PC, the 'Update Firmware' screen will appear. The unit will shut down once updated

### Camera ID Update

1. Download and run the 'HDA Device ID Tool' software. Please note, you must ensure the Muvi HD Pro 3 software has been closed for this to operate
2. Connect the camera to your PC as prompted
3. Insert your device ID into the text box and click 'Configure'

4. Enter your camera password then click 'OK', you should see a configuration success prompt
5. Disconnect the camera and close down the software
